Stella Millwood

Experience

UX Engineer at Swedish Public Employment Service, Solna 2023 –

- Conduct UX research, design Figma prototypes and implement solutions in production.
- Maintain and develop front-end Angular applications used daily by thousands of users.
- Bridge design and development, coordinating across teams and collaborating with the internal design system to troubleshoot components and contribute improvements.

Angular

WCAG

Figma

UX research

Prototyping

UX Engineer / Research Assistant at Stockholm University, Kista

2022 – 2023

Contributed to an environmental study by gathering and analyzing user data, playing a pivotal role in designing and developing the front-end of a project website and integrating sensor technology.

Javascript, HTML&CSS

Figma

UX Research

Prototyping

Design Internship at AGoodId, Stockholm

2021 – 2021

Completed a full-time, 6-month internship. Established a Figma-based design system and conducted usability evaluations on a client website to identify bugs and improve UX.

Usability Evaluations

Education

Stockholm University (Master's Degree)

2021 – 2023

Master's degree in computer and systems sciences, specialization in design for creative and immersive technology

Stockholm University (Bachelor's Degree)

2017 – 2018 and 2019 – 2021

Bachelor's degree in computer and systems sciences, specialization in interaction design

Academic Recognition

Recognized for strong academic performance, I was hired to assist Stockholm University in human-computer-interaction research, recommended for complex UX work with a defense contractor, and invited to teach for the interaction design bachelor program, confirming my ability to translate design theory into practice.
